

How to Start Playing

Getting started on Pinecraft Equestrian is simple, and the server will guide you through your first steps.

1. Join the Network

Open Minecraft and connect using:

pinecraftequestrian.com

When you join, you will arrive in the Lobby.

2. Head to the SMP

From the Lobby, make your way to the SMP server by entering the portal on your right.

This is where the main Pinecraft Equestrian experience takes place, including horses, training, breeding, racing, and more.

3. Complete the SMP Tutorial

When you first join the SMP, you will be taken through a short tutorial.

This serves as an introduction to the server and gives you some useful starter items to begin your journey.

This tutorial includes:

- a **Plot Claim Item**, which you can place in the wilderness to create your own protected plot
- a visit to **Pineton Stables**, where you get to choose your first horse

4. Choose Your First Horse

At the end of the tutorial, you will visit **Pineton Stables**.

There, you will get to choose your first horse through a breed selection menu.

For your very first horse, only mountable breeds are available. Smaller miniature breeds become available later, once you already own at least one mountable horse.

After that, your journey as a rider can begin.

5. Claim Your Plot

Once you are ready to settle in, use your Plot Claim Item wherever you would like to create your protected area.

This gives you a place to build and begin your life on the server.
