

08. Horse Market

In-game horse buying, selling, adopting, and listing management.

(Cover is /warp hmarket!)

- [The Horse Market \(/h panel\)](#)
- [Horse Market \(/warp HMarket\)](#)

The Horse Market (/h panel)

The Horse Market lets players browse, buy, adopt, sell, and manage horse listings through ModN Equine.

Open the horse panel with:

```
/h  
/h panel  
/horse panel
```

Then choose **Horse Market** (emerald icon).

The following options will be available:

1. browse market (compass)
2. my listings (paper)

Browsing Listings

The browse market screen shows active public listings.

Listings can be viewed by page and sorted by:

- newest
- lowest price
- highest price

Click on a listing to tp to the horse. Clicking on that horse will open up the menu to buy a horse.

Selling a Horse

Horse owners can list eligible horses through the horse detail panel.

Open /h panel, choose the horse desited and look for market or selling options.

A horse may not be eligible for sale if another system is currently using or restricting it.

Managing Your Listings

Use the market area to manage your own listings.

You will be able to:

- view active listings
- cancel a listing

Listed Horses in the World

Listed horses behave differently from normal active horses.

If a horse is actively listed on the market, right-clicking it may open the market listing instead of mounting it.

This helps protect market horses from being used normally while they are for sale or adoption.

Listed horses cannot be bred.

Foals on the Market

Foals may appear in market or adoption systems.

Adopted foals require special care. They must be fed with a **bucket of milk** each day until they mature.

Normal horse food does nothing.

Horse Market (/warp HMarket)

To get to the physical horse market, type the following command in chat.

```
/warp hmarket
```

You can find horses listed for sale here by other players, organized by price.

By going to the small stall in the front and clicking on the npc there, you can read the instructions and rules.
